I am a master student (estimated graduate time: 2022/06) majoring in natural language processing (NLP) at *School of Cyber Science and Engineering, Wuhan University*, China. I am currently working on *Affective Computing*, *Social Media Analysis* and partially *Parsing* NLP tasks. I have employed the external syntactic and linguistic features to aid aforementioned NLP tasks. In my future research, I plan to apply the 'structure-aware' strategy to many more sentiment-based scenarios, such as opinionated *text generation*, emotion-aware *multi-modal*, etc.
